# 1.0 British Transport Police Statistics & Performance Figures - Introduction

This bulletin contains crime and performance statistics for the year 1 April 2002 to 31 March 2003. Where appropriate, a comparison is given for the previous year.

The crime/offence figures are collated from the British Transport Police's computerised crime reporting system, 'PINS'. The recording of crime is not static and the figures represent a snapshot in time, i.e. the state of the system at 31 March 2002 and 2003.

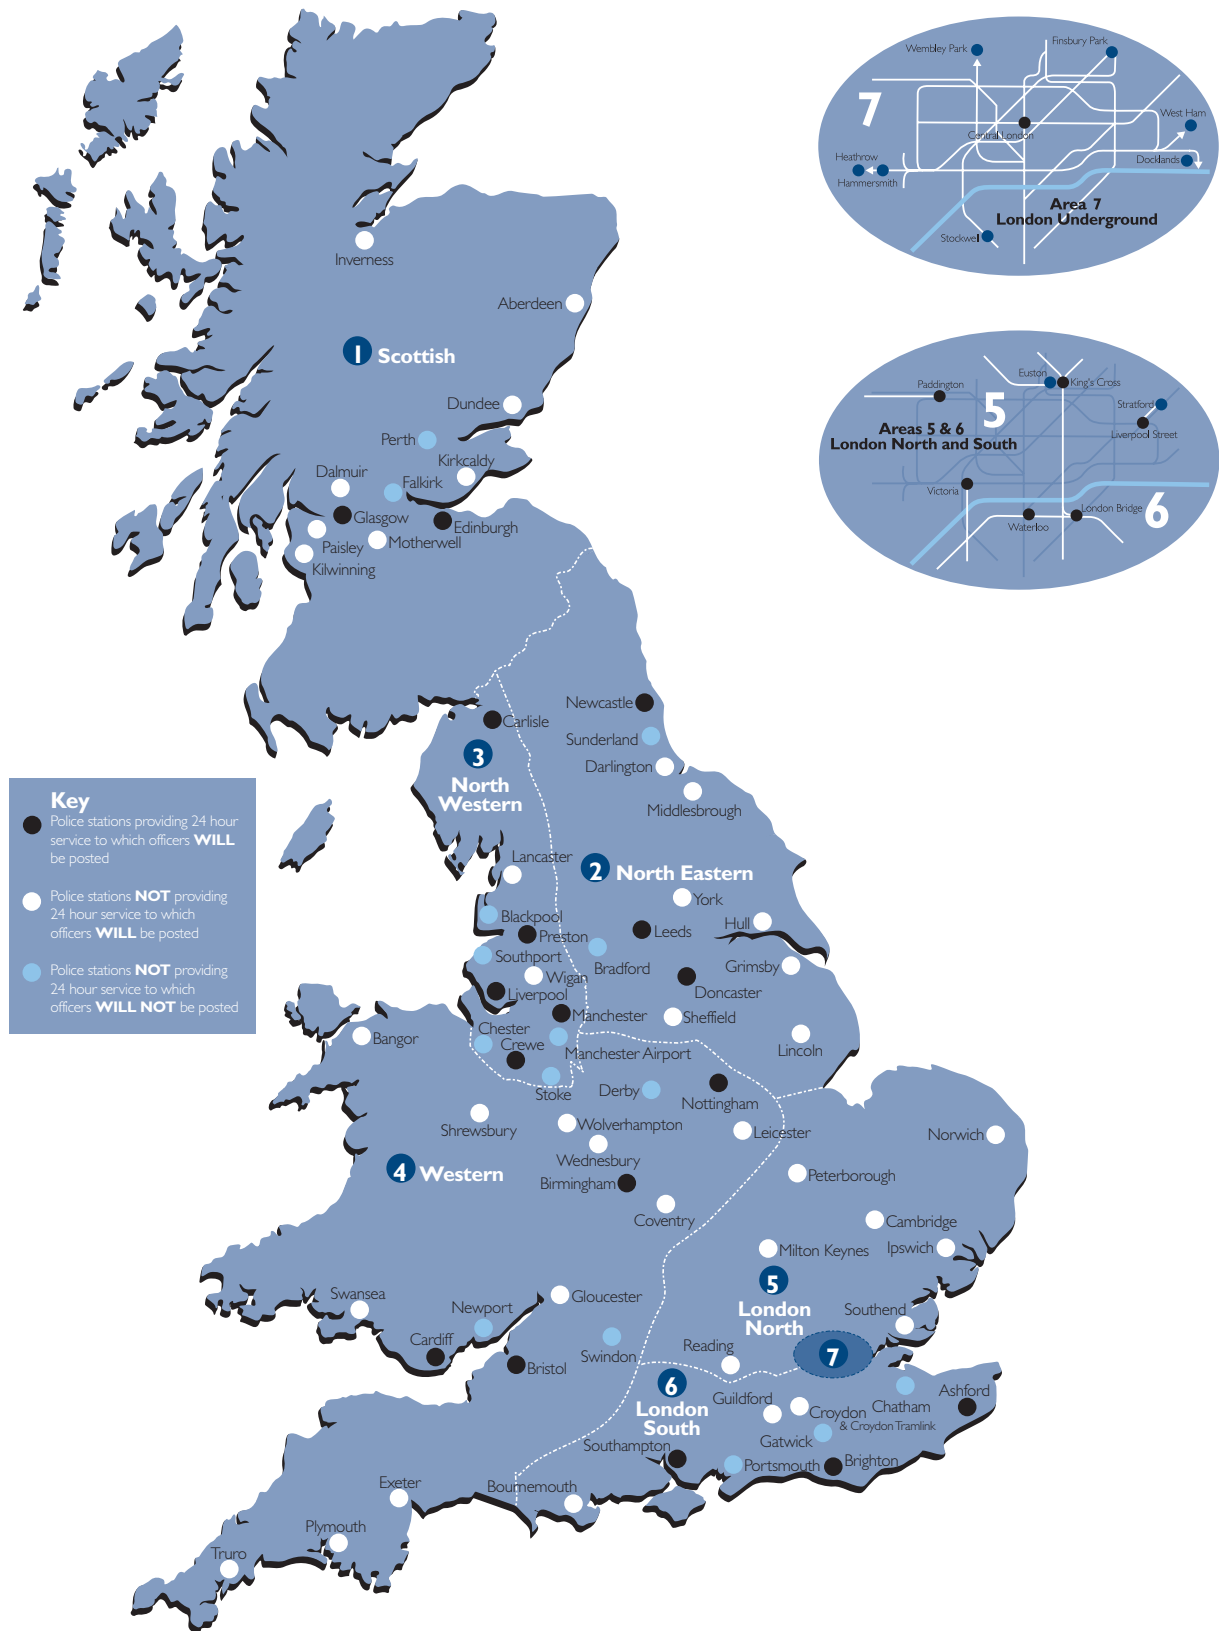

The crime statistics are broken down into the twelve crime categories now used by the British Transport Police to reflect Home Office practice more closely. Crime groups are within two categories, notifiable offences- serious offences reported to the Home Office (crimes in Scotland) - and non-notifiable offences - less serious offences not reported to the Home Office (offences in Scotland). In Scotland, all crimes and offences are reported to the Scottish Office and published in their bulletin. They are also broken down for England, Wales and Scotland, and further, in England and Wales, to the Force's seven geographical Areas (see map page 4). The London Underground Area includes Docklands Light Railway. From 1 April 2003, the Midland and South Western Areas were merged into a new Western Area.

Crime statistics should be treated with caution. Dramatic fluctuations up or down can be misleading and, if misused, statistics can contribute to the fear of crime. Hundreds of millions of passenger journeys are made safely each year and the statistics should be viewed in that context.

## The following points are given for guidance:

1. The Home Office introduced a National Crime Recording Standard (NCRS) that all police forces across England and Wales were required to adopt. The BTP adopted this standard on the 1st April 2002. The basic principles of NCRS are that if on the balance of probability a crime has been committed it is recorded as a crime. The standard has made crime recording more victim focussed, but has contributed to the rise in crime that has been recorded by the Force.
2. Crime statistics are not always accurate indicators of levels of crime. Police activity to target particular offences, changes in reporting patterns and other factors can affect crime figures.
3. Apparent anomalies, such as more crimes being detected than have been reported, are due to the fact that statistics reflect crimes and detections recorded in the period. Detections may relate to crimes reported in earlier periods.
4. This year, the London South Area recorded a 127% increase in line of route offences. This was due to a radical change in recording practices.

## 5.0 Policing Plan Objectives & Targets 2002/03

Target Description	Annual Performance 2002 – 2003			Comments
	Target	Actual	Target Achieved	
<b>Violence Against a Person (including sexual assault)</b>				
Recorded offences to be no more than the position at 31 March 2002.	6148	7458	X	Nationally there has been a significant rise in recorded offences of this type, attributed in part to new recording standards. HMIC estimated the impact of this to be a rise of between 15% to 30%. BTP has limited this rise to 21% against a national trend of +23%. Performance against this objective has to be viewed in this context.
Increase the number of detections by 5%.	2394	2533	✓	An increase in the number of reports of staff assaults is evident within these figures, consequently this is specifically reflected in this Policing Plan.
<b>Robbery</b>				
Recorded offences to be no more than the position at 31 March 2002.	3408	2304	✓	BTP received £1.36 million as part of the Government street crime initiative. Close partnership working with local police forces has enabled BTP to reduce offences by 32%, placing it as the top performing Force in this priority area of policing.
The number of detections to be increased by 5%.	705	588	X	Reducing offences by such a significant amount affects the actual number of offences detected. However, the detection rate has been raised from 17% to 26%.
<b>Vehicle Crime</b>				
A 2% reduction in the number of recorded offences.	10753	9136	✓	A significant reduction in the number of offences (-17%) has been achieved, placing BTP as one of the top performing Forces nationally.
Increase the number of detections by 25%.	1026	981	X	The actual number of offences detected did not increase by the amount intended. However, against the reduction in crime identified above, an increase of 14% in detected offences was achieved.

Target Description	Annual Performance 2002 – 2003			Comments
	Target	Actual	Target Achieved	
<b>Railway Disruption</b>				
A 2% reduction in the number of recorded offences.	5599	5913	X	The increase in recorded offences is largely attributable to the efforts of a single Area to improve the quality of its database to better understand the nature of the problem, leading to a 106% increase in its recorded crime. Other indicators such as data held nationally by the rail industry show a continuing fall in the number of offences across the network. The establishment of a National Route Crime Working Group has enabled the Force to work more closely with the industry. One result of this approach has been a far greater understanding of the scale of offences and better reporting. Joint targets have been set with the industry for the coming year.
<b>Managing Fatalities</b>				
In 85% of all fatalities within the rail network (exc. Suspicious and RTA), police activity to be concluded within 120 mins or 90 mins for the underground system.	85%	76% overground  58% underground	X	A greater focus on police activity at fatality incidents has enabled us to reduce the overall average time to 103 minutes on the overground railway. Achievement of the target in 76% of overground cases is a significant improvement.
<b>Policing Football</b>				
No more than 81 incidents during the year.	81	62	✓	Although there will be no specific target in respect of football in this year's Plan, we will maintain attention through the focus on anti-social behaviour.
