01 Introduction

This bulletin contains crime and performance statistics for the year 1 April 2006 to 31 March 2007. Where appropriate, a comparison is given for the previous year.

The crime/offence figures are collated from the British Transport Police's computerised crime reporting system, 'CRIME'. The recording of crime is not static and the figures represent a snapshot in time, i.e. the state of the system at 31 March 2006 and 2007.

The crime statistics are broken down into the twelve crime groups now used by the British Transport Police to reflect Home Office practice more closely. Crime groups are within two categories, notifiable offences – serious offences reported to the Home Office (crimes in Scotland) – and non-notifiable offences – less serious offences not reported to the Home Office (offences in Scotland). In Scotland, all crimes and offences are reported to the Scottish Office and published in their bulletin. They are also broken down for England, Wales and Scotland, and further, in England and Wales, to the Force's six geographical Areas (see map page 4). L Area includes London Underground and Docklands Light Railway (DLR).

Crime statistics should be treated with caution. Dramatic fluctuations up or down can be misleading and, if misused, statistics can contribute to the fear of crime. Hundreds of millions of passenger journeys are made safely each year and the statistics should be viewed in that context.

The following points are given for guidance:

1_The Home Office introduced a National Crime Recording Standard (NCRS) that all police forces across England and Wales were required to adopt. The BTP adopted this standard on the 1st April 2002. The basic principles of NCRS are that if on the balance of probability a crime has been committed, it is recorded as a crime. The standard has made crime recording more victim focussed.

2_Crime statistics are not always accurate indicators of levels of risk. Police activity to target particular offences, changes in reporting patterns and other factors can affect reported crime figures.

3_Apparent anomalies, such as more crimes being detected than have been reported, are due to the fact that statistics reflect crimes and detections recorded in the period. Detections may relate to crimes reported in earlier periods.

2006/07 statistics

Total offences (Notifiable and non-notifiable) fell in 2006/07 by 4.2% with a total of 124,900 offences reported. Notifiable crime was down 0.1% from 79,278 to 79,191. Passenger journeys on Britain's rail systems are at record levels with over 1.1 billion journeys on National Rail, up some 7%, and 1.6 billion on London Underground and DLR in 2006/07, up 3%. Measured against those, the crime figures indicate a safe and low crime environment.

Within these figures there were substantial declines in several important areas, including 10% fewer robberies, theft of passenger property down by six per cent and route crime down 17%, the fourth successive reduction. Serious assaults fell by 16%, although common assaults were up six per cent, contributing to an overall increase in violent crime of 2.6%.

Criminal damage was up, largely due to police activity to target graffiti. An additional 988 graffiti crimes were recorded, a rise of 22.3%. Similarly, success in targeting anti-social behaviour, with 18,013 offenders brought to justice, has led to increased public disorder crimes being recorded - up 1,747 crimes or 35.4%.

Several of the 2006/07 Policing Plan targets (see page 9) were about increasing detections. The detection rate for all offences (notifiable and non-notifiable) was 31.9%. Of the 79,191 notifiable crimes reported to BTP in 2006/07, 19,505 were detected, a detection rate of 24.6% compared to 20.7% in 2005/06.
