## Introduction

This bulletin contains crime and performance statistics for the year 1 April 2009 to 31 March 2010. Where appropriate, a comparison is given for the previous year.

The crime/offence figures are collated from British Transport Police's (BTP's) computerised crime reporting system, CRIME. The recording of crime is not static and the figures represent a snapshot in time, i.e. the state of the system at 31 March 2009 and 2010.

BTP compiles crime statistics for England, Wales and Scotland. In England and Wales, these statistics are broken down into six geographical areas – North Eastern, North Western, Wales and Western, London Underground/DLR, London North and London South.

In England and Wales, crimes fall into two groups: notifiable offences, which are serious offences that have to be reported to the Home Office; and non-notifiable offences, which are less serious offences not reported to the Home Office.

In Scotland, all crimes and offences are reported to the Scottish Office and published in their bulletin.

The groups are then broken down into 12 crime categories:

- violence against the person
- sexual offences
- criminal damage
- line of route offences
- theft of passenger property
- motor vehicle/cycle offences
- robbery
- theft of railway property
- public disorder offences
- fraud offences
- drugs
- other crimes

Crime statistics should be treated with caution. Dramatic fluctuations, whether up or down, can be misleading and if misused statistics can contribute to the fear of crime. Hundreds of millions of passenger journeys are made safely each year and the statistics should be viewed in that context.

The following points are given for guidance:

- 1 The Home Office introduced a National Crime Recording Standard (NCRS) that all police forces across England and Wales were required to adopt. BTP adopted this standard on 1 April 2002. The basic principles of NCRS are that if on the balance of probability a crime has been committed, it is recorded as a crime. The standard has made crime recording more victim focused.

- 2 Crime statistics are not always accurate indicators of risk. Police activity to target particular offences, changes in reporting patterns and other factors can affect reported crime figures.
- 3 Apparent anomalies, such as more crimes being detected than have been reported, are due to the fact that statistics reflect crimes and detections recorded during a specific period. Detections may relate to crimes reported in earlier periods.
- 4 A summary of 2009/10 crime statistics was published by press release on 25 May 2010.
- 5 The 2008/09 figures for North Eastern and Wales and Western Areas have been adjusted to take account of boundary changes, so that a true year on year comparison can be made. The East Midlands Sector (Derby, Leicester and Nottingham police station areas) moved from Wales and Western Area to North Eastern from 1 April 2009. The 2008/09 figures for these two Areas are therefore different from those published in the previous bulletin.

### 2009/10 statistics

Total notifiable and non-notifiable offences fell in 2009/10 by 8.8% with a total of 96,346 offences reported. Notifiable crime was down 7.3% from 67,217 to 62,295.

Within these figures, there were 6.8% fewer violence against the person crimes, including an 11.5% fall in serious assaults.

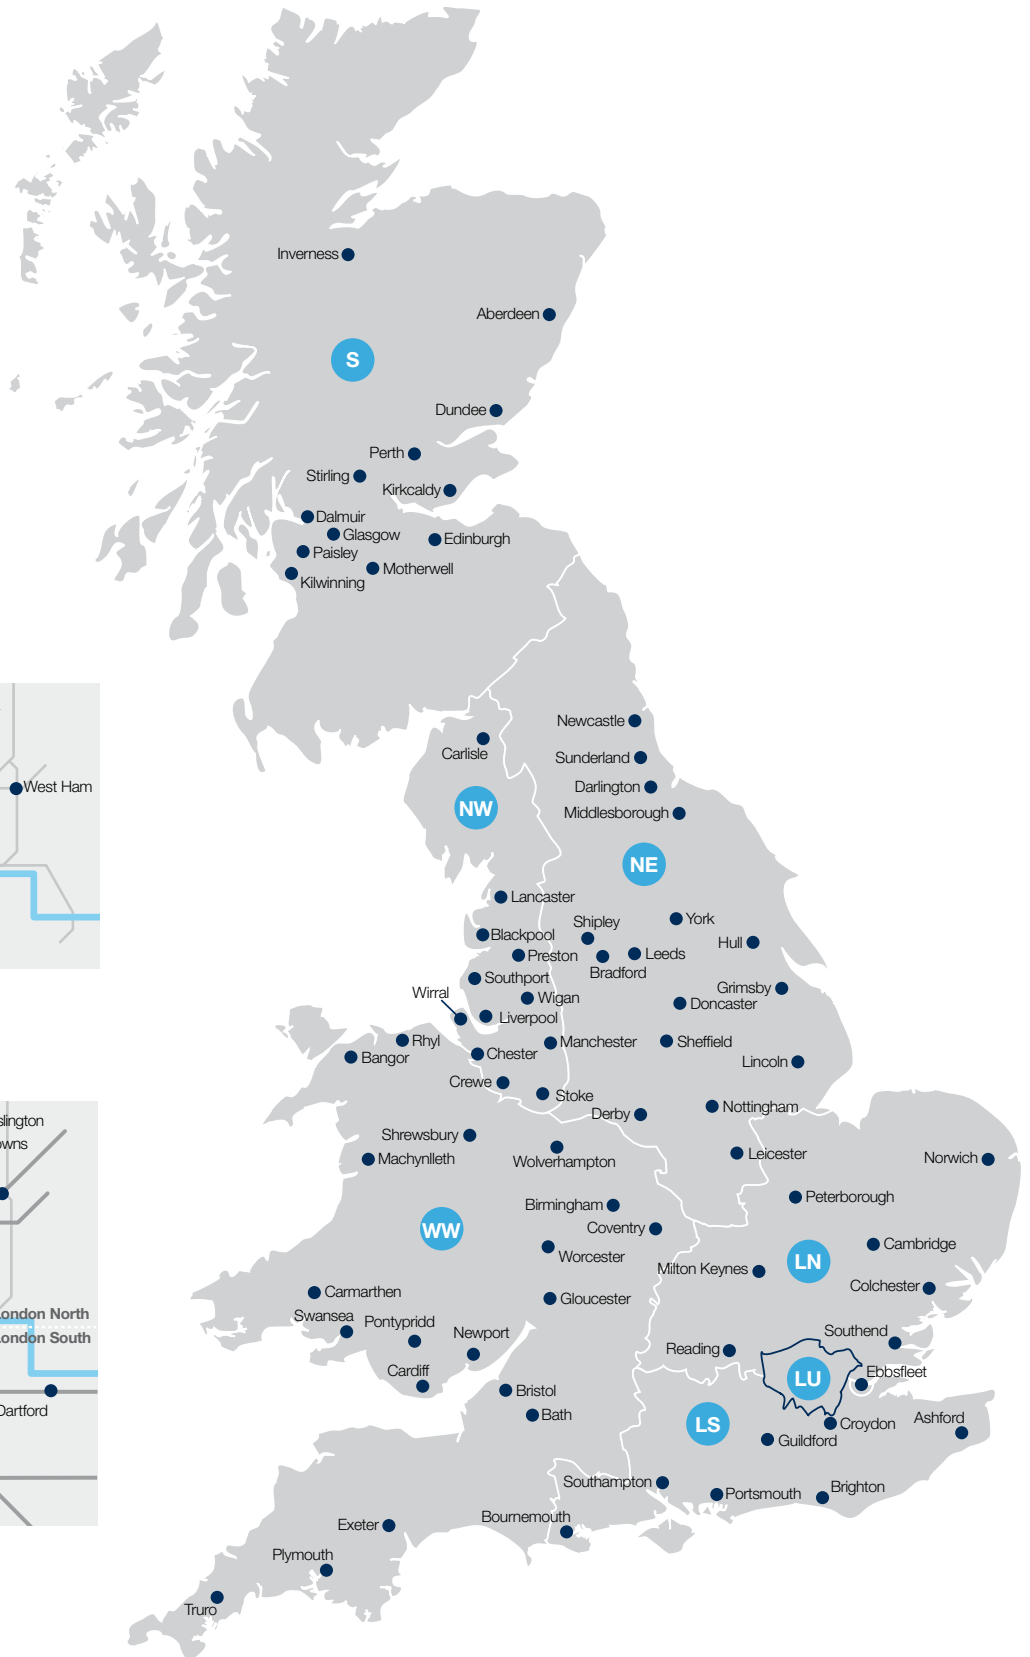

Robberies were reduced by 21.8% following a 15.7% fall the previous year and route crime was down for the seventh year in a row, by 21.6%. Criminal damage fell by 11.7%.

There was a 3.5% decrease in public disorder offences, whilst drugs offences remained largely stable, down 0.3%, as did theft of passenger property, down 0.6%.

The detection rate for all offences (notifiable and non-notifiable) was 42.1%, up from 39.8%. Of the 62,295 notifiable crimes reported to BTP in 2009/10, 21,860 were detected; a detection rate of 35.1% compared to 32.3% in 2008/09.
